# It may be better to say What are Angel Aligners

Angel Aligners is a series of custom-made removable clear orthodontic aligners that gently move the patient's teeth into the proper position over time. It has over 20 years of product development, and a large number of patients had their smiles transformed by Angel Aligner.

## How does Angel Aligners align your teeth?

Using artificial intelligence, computer simulations and the application of our new-generation self-adaptive material -- masterControl S, Angel Aligner Select provides you with a clinician-prescribed treatment plan. Your aligners for each stage are customized to gradually move your teeth into the desired position.

## Angel Aligner Product Highlights

The self-adaptive material initiates intelligent control on tooth movement

Gentle and constant force provides a more comfortable experience

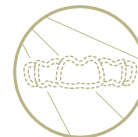

360° fitting delivers superior comfort

Fully trimmed aligner for better comfort
